

VoteNotes Product Requirements Document (PRD)

1. Overview

Product Name

VoteNotes

Tagline

Suggest anonymously. Vote anonymously. Decide together.

Summary

VoteNotes is an anonymous collaborative decision-making platform that enables groups to submit suggestions, ideas, questions, or feedback anonymously and vote on them in real time.

The product is designed for low-pressure group decisions among friends, students, church leaders, teams, and meeting participants.

Examples include:

- Choosing a movie to watch
- Selecting a class project topic
- Prioritizing church initiatives
- Gathering feedback during meetings
- Brainstorming ideas in workshops

No account creation is required.

2. Problem Statement

Groups often struggle to make decisions because:

- A few vocal participants dominate discussions
- People hesitate to express unpopular opinions
- Individuals conform to the majority view
- Existing polling tools are too formal, expensive, or complicated

VoteNotes provides a lightweight and psychologically safe environment where every participant can contribute equally.

3. Goals

Primary Goal

Help groups reach decisions quickly and fairly.

Success Metrics

- 100 sessions created
 - Average session duration under 10 minutes
 - At least 60% participant engagement
 - 40% returning creators
-

4. Target Users

Friends

Use Case

Friday night movie selection

Students

Use Case

Project topic selection

10. Future Features

- Emoji reactions
- Discussion threads
- Export results
- Google Meet companion extension
- Multiple boards
- Timer mode
- Anonymous comments
- Templates

Examples

- Movie Night
- Church Planning
- Study Group
- Sprint Retrospective

11. Positioning

VoteNotes is an anonymous decision board for everyday groups.

Unlike Slido or Mentimeter, VoteNotes focuses on small groups making real decisions rather than audiences answering polls.

Core Promise

Everyone gets a voice.

Nobody gets pressured.

Groups decide faster.
